---

We have a programme which runs every two weeks, each of which includes a lecture or activity session of some kind.

Throughout the year we have a number of other Club activities, such as:

[Portable and contest operations](#)

[Wednesday Workshops](#)

[Radio direction-finding \(ARDF\) hunts](#)

[Special Event Stations](#)

[Ramblers on the air](#)

[Amateur Television](#) *outside broadcasts*

We are a Registered Centre for the *RCE* examinations, we're running [training courses](#) to help our Members to climb up the Licensing ladder, and we've already got many of them through their exams.

Alternating with our Monday night meetings, we also get together on the air for Club Nets; listen out for **G0BWC/A**, **G1ONE/A** and many of our members between 8 and 10pm on the following bands/modes:

*2m FM and SSB, 6m FM, 4m FM, 70cm FM, 10m FM, 160m and 80m SSB.* Recently, some of our members have also become interested in DMR, so if you have a DMR capable radio, please have a listen (or give a call) on DH2 (438.600 MHz).

Our Club Nets regularly attract over a dozen stations, sometimes using simultaneous channels on 2m, 6m and 4m. We occasionally spread out into the 10m, 160m and 80m bands too, where we've linked up with Club members all the way from South Wales and Cambridge!

*Please call in if you hear us - you don't need to be a Club Member to join our Net!*

As well as voice telephony, we'll also try out a number of different modes throughout the year, and try to link up with our Members further afield during their holidays.
